EDUCATION

Pace University, Seidenberg School of Computer Science and Information Systems

New York, NY

Master of Science (MS) in Data Science | Concentration: Data Analytics & Machine Learning | GPA: 3.81/4.0

May 2026

Vivekanand Education Society's Institute of Technology (VESIT)

Mumbai, India

Bachelor of Engineering (B.E) in Electronics & Telecommunication | CGPA: 8.74/10

May 2024

RELEVANT COURSEWORK

Applied Data Analytics | SQL & Database Systems | Statistical Learning & Data Mining | Big Data & Cloud Computing | Python for Data Analysis | Machine Learning

TECHNICAL SKILLS & CERTIFICATIONS

Languages: Python, R, SQL | **Data Analysis & Visualization:** Tableau, Power BI, Excel, Streamlit, FastAPI, Plotly

Analytics & Modeling: EDA, Regression, Forecasting, Gradient Boosting, XGBoost, A/B Testing, KPI Analysis

Cloud & Data Platforms: AWS (Redshift, S3, SageMaker, EC2, EMR), MongoDB Atlas, PostgreSQL, MySQL, Hadoop

Libraries & Frameworks: Python (Pandas, NumPy, Scikit-learn, Matplotlib), R (ggplot2, Tidyverse)

Enterprise Tools: Power Automate, SharePoint, Dynamics 365 CRM, SAP (ERP Systems)

Business & Reporting: Dashboard Design, Stakeholder Reporting, Data Quality

Certifications: IBM- Python for Data Science | Codefinity- Python & SQL | Microsoft- Data Analysis and Visualization with Power BI

PROFESSIONAL EXPERIENCE

Red Hill Consulting, New York, NY | Data and Automation Engineer

Sept 2025 – Present

- Automated CRM-driven data workflows using **Dynamics 365**, **Power Automate**, **SharePoint**, and **AWS (S3)**, reducing manual tracking effort by **30%** and improving data consistency across RFP and project pipelines
- Designed and delivered **Power BI dashboards** tracking **10+ business KPIs**, reducing reporting turnaround time by **25%** and improving decision-making efficiency for stakeholders
- Consolidated and transformed data from **multiple sources (CRM, SharePoint, and cloud platforms)** into structured, analytics-ready datasets, improving data quality by **20%** and supporting **data governance, reporting, and cross-functional decision-making**.

ACADEMIC / PERSONAL PROJECTS

Beyond Detection: Explainable Fraud Investigation System with Behavioral Risk Scoring

Feb 2026 - May 2026

- Built an **end-to-end fraud investigation system** on **6.3M+ transactions** using **XGBoost**, achieving **~98% recall** and generating **transaction-level SHAP explanations (Top-5 drivers)**, enabling **financial risk assessment** and **audit-ready decisions**.
- Designed a **Fraud Confidence Index (0–1)** combining **model probability**, **behavioral deviation**, and **transaction impact**, and implemented a **RAG-based similar case retrieval system (top 3–5 matches)** with a **Streamlit dashboard** to **prioritize high-value fraud cases**, **accelerate alert validation**, and **reduce investigation effort**.

Customer Churn & Revenue Leakage Analytics Dashboard

Jan 2026

- Analyzed **90K+ records** using **SQL** and **Python** to identify churn drivers, usage patterns, and revenue leakage across customer segments, improving segmentation and retention insights.
- Built **Power BI dashboards** with cohort analysis and **10+ KPIs**, streamlining reporting and providing real-time visibility into churn trends.

AI-Powered Economic Forecasting Project | Pace University Research Day (Poster Presentation)

May 2025

- Built a data pipeline to extract, clean, and merge large datasets from **NYC Open Data**, **Zillow**, and **BLS** using **SQL**, **Python (Pandas)**, and **Excel**, enabling KPI-based analysis of key economic sectors such as real estate, tourism, trade, and earnings.
- Evaluated machine learning algorithms, selected **XGBoost** for best performance, and developed a **Power BI dashboard and interactive web app** with slicers for **1–12 month earnings forecasts**; presented insights to **100+ faculty and industry professionals**.

NYC 311 Service Request Analysis & Complaint Resolution Time Prediction

Apr 2025

- Built a **Gradient Boosting model (80% accuracy)** on **1M+ NYC 311 requests** using **SQL**, **Python**, performing **data cleaning and feature engineering** to predict **resolution timelines** and surface **operational delays**, with **Power BI dashboards** driving borough-level insights.

MICRO INTERNSHIPS

1st Prize Winner - SmartSan NYC Sanitation Dashboard (with MongoDB, Spotify & S&P Global) | Pace University

Nov 2025

- Developed a **real-time sanitation dashboard** using **Python**, **FastAPI**, and **MongoDB Atlas**, integrating live **311 complaints**, **traffic streams**, and **tonnage insights** while designing scalable MongoDB schemas and automated ETL pipelines with **geospatial indexing**.
- Improved **waste-route planning and hotspot detection** for more efficient DSNY operations.

Computer System Design & Development with CaterPal Technologies | Pace University

Mar 2025

- Designed and deployed **Python API endpoints with NLP integration** to deliver real-time menu, pricing, and reservation data through an **AI-driven chatbot**, enabling dynamic customer interactions and live client testing.

LEADERSHIP

- CareerGenie: AI Mentor** | Co-Developer & Finalist, Built with AI Hackathon - Pace AI Lab, Google for Developers Group

May 2025
